

ABUBAKAR ALI ABDULLE

SOFTWARE ENGINEER

PROFESSIONAL SUMMARY

Software developer with hands-on experience building web, mobile, backend, and digital systems. Experienced with JavaScript, Python, Go, modern frameworks, databases, and Docker. Two-time SomNOG Software Development Track winner with real-world internship and startup experience.

EXPERIENCE

Software Engineer Present

Fiddo Technology - Nairobi, Kenya

- Contributing to the development of an internal Mini ERP system for business operations.
- Working on backend APIs, database design, business workflows, and administrative interfaces.

Software Developer Intern 6-month internship

Tabaarak ICT Solutions — Mogadishu, Somalia

- Built and contributed to real-world web and mobile software solutions with the engineering team.
- Worked across REST APIs, frontend development, databases, authentication, deployment, and team collaboration.

PROJECTS

Vehicle Registration System – Award-Winning (SomNOG 8) | Lead Developer 1st Place — 2025

Tech: NestJS, PostgreSQL, Prisma, Next.js, Docker, K8s

- Designed a digital vehicle registration and verification system with online submission, admin review, approval, and rejection workflows.
- Implemented secure authentication, role-based access, REST APIs, and centralized relational records.

Property Management System – Award-Winning (SomNOG 7) | Lead Developer 1st Place — 2024

Tech: MERN Stack (MongoDB, Express, React, Node.js)

- Designed a digital property and owner registration platform with centralized records, administrative verification, and approval workflows.
- Implemented role-based access control and reduced manual paperwork through structured digital workflows.

Fuel Price Tracking System

Tech: MERN Stack, Flutter

- Built a multi-platform system with a web admin dashboard, supplier Flutter app, and consumer Flutter app.
- Enabled users to compare fuel prices and identify cheaper and nearby fuel stations.

Hall Booking System

Tech: PostgreSQL, Prisma, Express, React, Flutter

- Built a multi-role hall booking platform with an admin web dashboard, manager mobile app, and customer mobile app.
- Implemented booking workflows and backend APIs for administrators, venue managers, and customers.

EDUCATION

Bachelor in Computer Applications | Expected Graduation: September 2026

Jamhuuriya University of Science & Technology, Mogadishu, Somalia

- CGPA: **3.8, Top 5%** in my Department

TECHNICAL SKILLS

Programming Languages:

JavaScript (ES6+), Python, Go (Golang)

DevOps & Tools:

Git, Docker, CI/CD Pipelines, Kubernetes (K8s)

Backend & APIs:

Node.js, NestJS, Express, REST APIs, Prisma

Databases:

PostgreSQL, MongoDB

Frontend:

Next.js, React

Mobile:

Flutter

ACHIEVEMENTS & LEADERSHIP

1st Place Winner – SomNOG8 (2025), Software Development Track

1st Place Winner – SomNOG7 (2024), Software Development Track

Participant – PyCon Somalia (2024, 2025)

Hackathon Participant – MTI Institute (2025)

CERTIFICATIONS

SomNOG 8 – Software Development Track (Participation Certificate)

SomNOG 7 – Software Development Track (Participation Certificate)

PyCon Somalia 2025 (Participation Certificate)

PyCon Somalia 2024 (Participation Certificate)

MTI Institute Hackathon 2025 (Participation Certificate)
